SUMMARY

AI & Data Science student building agentic AI, satellite-vision and physical-AI systems. 1st place at the BGSCET Ideathon 2026, 2nd place at the National Physical AI ROBOTHON and HACKBLAZE 2K25, First Runner-Up at Anvation 2026.

EDUCATION

B.E. Artificial Intelligence & Data Science, BGS College of Engineering & Technology (BGSCET), Bengaluru, 2024 – 2028

PROJECTS

- **Sathya Drishti** (SIH 2026, ISRO/SAC PS 26167): agentic vision-language assistant for satellite imagery, with GeoTIFF analysis (rasterio), change detection and optical + SAR fusion. FastAPI, Gemini API; LoRA fine-tune planned on BigEarthNet, VRSBench and CDVQA.
- **Pehchaan** (Anvation 2026, First Runner-Up): learns a creator's voice and writes posts in English, Hindi and Kannada with scored variants, guardrails and an Evidence View. TypeScript, Vite, Express, MCP.
- **KAIROS** (Build-Ora 2026, Hack Malenadu'26): predictive maintenance using Isolation Forest, an LSTM autoencoder and CUSUM to estimate remaining useful life; on-device SLM narrates faults on a Three.js dashboard.
- **CareSync AI**: elderly care platform with voice biomarkers, Supabase, Claude API and n8n workflows, built in a 24-hour hackathon.
- **DevMind AI** (HackToFuture 4.0), **FraudShield** (Xpecto'26, IIT Mandi, solo; RapidMiner and Mendix), **VitaAI** (HackMarch 2.0; React, Claude API), **Veritas** (influencer analytics, XGBoost, FastAPI), **SNUFF** (personal AI assistant with document RAG, solo).

ACHIEVEMENTS

- 1st place, BGSCET Ideathon 2026, with Sathya Drishti (topped the internal selection round with 94 points).
- 2nd place, National Level Physical AI ROBOTHON (IEEE RAS): ROS, MoveIt, MuJoCo, LeRobot SO-101 arm calibration.
- First Runner-Up, Anvation 2026 (KSSEM, 24-hour national hackathon), 8–9 Oct 2026.
- 2nd place, HACKBLAZE 2K25 (TechVidya).
- Flipkart GRiD 8.0: reached Round 2.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C, SQL
Agents and LLMs: Claude API, Gemini API, n8n, MCP, multi-agent RAG
Machine learning: Isolation Forest, LSTM autoencoders, XGBoost, CUSUM, LoRA fine-tuning
Vision and geospatial: vision-language models, rasterio, GeoTIFF, change detection
Front end: React, TypeScript, Vite, Tailwind CSS, Three.js, GSAP
Back end: FastAPI, Node.js, Express, Supabase, PostgreSQL, Firebase
Robotics: ROS, MoveIt, MuJoCo, LeRobot
